

## THE 3GTMS INTEGRATION HUB: SPEEDS THAT ARE SECOND-TO-NONE

### Integrations are a particular hurdle for most TMS systems, but a TMS is only as powerful as its connections.

The 3Gtms Integration Hub is the industry's only business-to-TMS integration toolkit and our integration speeds are second-to-none. In fact, our customers tell us that the ability to quickly integrate with other systems and on-board customers are key factors in choosing to partner with us.

The unique design of our TMS allows for customers, carriers and trading partners to on-board faster and more cheaply than with other systems.

- ➔ Save money faster (for you and your customers) with lightning-fast integrations that beat our competitors by months
- ➔ Gain a long-term TMS solution with an evolving model that adapts with your business needs
- ➔ Set yourself apart from the competition by delivering bottom-line value more quickly
- ➔ Reduce the cost and complexity associated with the integration of complementary solutions including Order Entry, ERP, Partner/Carrier EDI and APIs and more
- ➔ Fast release and stability with continuous integration agile methodology
- ➔ Get better visibility into your operations with intuitive dashboards and embedded reports and analysis

“The ease of integration was the number one reason we chose 3Gtms. The experts at 3Gtms built an integration hub that’s unbelievably reliable. And the faster we get integrated, the faster we save money and our customers start saving money.”

Jeff Auslander, CEO and Managing  
Partner, Dynamic Logistix

## A Clear Difference

3Gtms Integrations	Other TMS Integrations
<p>One platform for ALL integrations:</p> <ul style="list-style-type: none"> <li>→ Traditional EDI</li> <li>→ Carrier web services</li> <li>→ External web services</li> <li>→ File-based workflows via FTP</li> <li>→ Automated Email data import</li> </ul>	<p>Different products for different integrations:</p> <ul style="list-style-type: none"> <li>→ Web services</li> <li>→ External EDI tool</li> <li>→ Proprietary file processing tool</li> <li>→ Email workflows NOT supported</li> </ul>
Powerful, industry-standard tools for developing workflows and data transformations.	Non-standard, proprietary capabilities, limited in scope.
Complex workflows can be built in a day.	Comparable workflows can take months.
3Gtms implementers or clients can program new workflows and data transformations. No product programming required.	Non-trivial workflows must be built via vendor programmers.
General-purpose languages are available to the implementer, enabling unlimited power and flexibility.	Restricted to the anemic capabilities you can choose from the GUI.
Componentized and architected for reusability. Existing, complex transforms can be used in any workflow. Simple tweaks can be made by non-programmers.	Best case scenario: You can copy and paste some existing transforms.
Handles data in ANY format: EDI, X12, CSV, fixed position files, XML, JSON	Different product needed for different data types: One for EDI, one for XML, one for CSV, etc.
Self-service: You can onboard carriers AND new clients – no help from 3Gtms required.	At the mercy of the vendor resources and schedules for carrier and client integrations.
Advanced monitoring and alerting provide a full audit trail for every transaction and user-defined alerts for any workflow.	Different capabilities for each product. No single platform for monitoring and alerting.

## We are a Different Kind of TMS

Transportation execution is the glue that holds your supply chain together. Created for shippers and logistics service providers, our uniquely designed TMS manages all activity from planning and optimization through rate management, integration, execution and payment.

### Fundamentally Different

An architecture and design distinct from anything else on the market

### Most Flexible

The power to self-configure; unique routing concepts; proprietary algorithms

### Highest Satisfaction Rate

The happiest customers and highest retention rate in the industry
