3Gtms

DRIVE PROFITABILITY AND FLEXIBILITY WITH A UNIQUELY DESIGNED MULTI-MODAL TMS

It's been more than 15 years since most Tier 1 TMS systems were designed. The industry has changed dramatically in the last decade or two, from the way orders are processed to routing configurations to customer expectations of speed and flexibility. Today's TMS landscape is riddled with bloated and rigid TMS systems – none of which can accurately or fully manage your current needs.

You wouldn't work with 15 year-old accounting software or cell phone technology. Why trust your logistics to a TMS designed for another era?

A New Era
We believe today's transportation issues require a new design of TMS to manage them.

3Gtms was founded to provide you with a wholly different technology: a flexible, configurable TMS that adapts to the modern and future needs of shippers and LSPs.

Our Goals
➔ Staff the most talented and experienced team in the industry
➔ Build the best product – no shortcuts
➔ Cultivate the happiest customers

Why 3Gtms?
➔ Implementations take weeks, not months
➔ Real-time saving calculations during optimization
➔ Feature rich and highly configurable, equals low TCO
➔ True multi-tenant SaaS and private cloud deployments
➔ New design, new technology, more savings
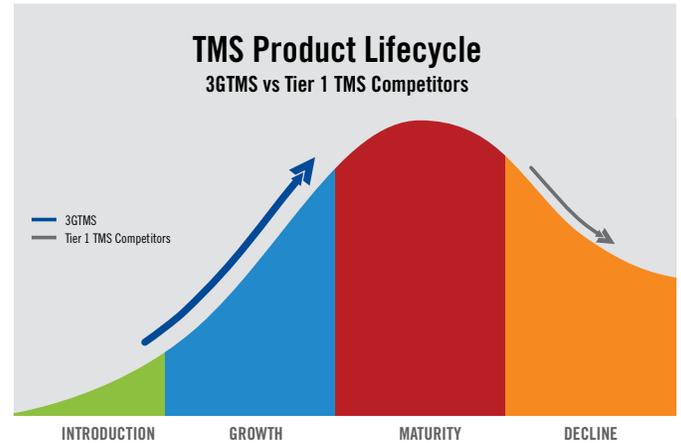

Our TMS: It's not the *what*, it's the *how*

TMS implementations are notoriously complex – some analysts estimate that 40% of TMS projects fail. So the question to ask a TMS vendor isn't "What can your TMS do?" but "How does your TMS do it?"

Our single platform, enterprise-class TMS software delivers a clear competitive advantage by driving bottom-line value throughout the full transportation lifecycle. With it, you are equipped with an intuitive, multi-modal TMS for parcel, LTL, TL, intermodal, pool distribution and more.

Our TMS is flexible to your current and future needs, and gives you the freedom to self-configure the software on your own. It is one of the primary reasons we are leading the industry in replacing prior generation TMS systems.

Who we serve

→ Shippers looking to take control of their transportation execution and save

→ LSPs, including 3PLs, freight forwarders and brokers wanting to expand their business model

→ Freight planners that need the newest and best routing optimization

→ Mid-sized and large companies with predominantly OTR transportation problems

→ North American and European transportation focus

INTRODUCTION | GROWTH | MATURITY | DECLINE

Unmatched, proven customer satisfaction

Our culture is built around 100% customer satisfaction and our technology delivers it. No one else in the industry comes close to this proven level of customer satisfaction.

3Gtms was founded by Mitch Weseley, who brings over a 30-year history and the most experienced team in the industry to develop a leading-edge transportation management software system.

"I haven't heard anybody at 3Gtms say 'that can't be done.'"

Glenn Adelaar, Sr. Vice President & CIO, Forward Air

"I've been involved in implementing and managing TMS systems for 30 years…I have not seen a system that was built on as rich of an architecture as 3Gtms."

Bill Grannis, Director of Information Technology, ODW Logistics & Transportation

"The choice wasn't just based on how the TMS can serve us now; it comes down to how it can adapt to new complexities and grow with our business."

Jeff Auslander, Chief Executive & Managing Partner, FloPath Automatic Logistics
