

## LOAD MANAGEMENT WORKSPACE FOR 3PLS

*Make faster, more profitable decisions with one screen and fewer clicks*

Speed and accurate data are key when you're moving customer freight and trying to get the best margins for your business. You're faced with questions such as, What trucks are available? Can they meet the delivery deadline? And what's a competitive but profitable quote?

---

3Gtms Load Management Workspace for 3PLs gives your 3PL a configurable, flexible and streamlined source for making fast and accurate decisions for your brokerage and managed services offering. Serve customers with fewer screens, fewer clicks, and more confidence that you're making a profitable decision!

- One screen compiles all critical information so you get a clear and fast snapshot to inform your quote
- Configurable screens let you tailor information to each user
- Automatic feed of DAT prices
- Workflows are configurable to the way you do business

Built into our Tier 1 transportation management system, the Load Management Workspace for 3PLs gives you everything you need to make smart decisions faster and easier.

## Key Features

Our SaaS-based Load Management Workspace for 3PLs gives your 3PL more visibility, automation and ease than any other TMS system on the market!

### Critical information on one screen

All critical information is compiled onto one intuitive screen, including load cost history and available carrier capacity. No more phone calls to track down trucks!

### Integrate with more customers, partners and systems

The robust 3Gtms Integration Hub enables integration with customers, data partners, and ERP systems for greater visibility. This includes partners such as p44, MacroPoint and 10-4, as well as ERP providers like Sage, Microsoft Dynamics and many others. You also have the ability to upload .csv files for better visibility across your operations.

### Data sharing with carriers

Your carrier can load their capacity into 3G-TM and it will automatically show up in multiple areas, including load cost history. With better visibility into your assets, you can more quickly respond to customers' needs and maximize your capacity.

### Configurable workflows to fit your business

Stop relying on rigid, pre-defined workflows; configure the workflows to fit how you want to operate.

### Fast Start implementation option

Get up and rolling in as little as two weeks! We'll provide templates that are flexible to your needs and that prioritize a fast ROI, while concurrently implementing the full range of 3G-TM brokerage tools.

Offering brokerage services and managed transportation services requires more insight, speed and efficiency than what other TMS systems on the market can offer. Only the 3Gtms Load Management Workspace for 3PLs and the power of our Tier 1 TMS give you a complete solution for moving with the market's demands and taking advantage of new opportunities.

The screenshot shows a search interface for carrier capacity. It includes fields for Status, Expiration, Carrier, Carrier Group, Equipment, and Equipment Group. Below these are sections for 'Final Pick Location' and 'Final Drop Location', each with fields for Load Final Pick/Drop Date/Time, Empty Origin Date/Time, and Load Final Drop Date/Time. There are also dropdowns for State and City. At the bottom, a table lists carriers with columns for Carrier, Expiration, Status, Contact, Equipment, # of Trucks, and Tractors. Buttons for 'Add New Rate', 'Assign Carrier', 'Assign Carrier & Tender', and 'Close' are visible.

Available Capacity

The screenshot displays a complex dashboard for load management. It features a map on the right side showing a geographic area with various markers. On the left, there are several data tables and panels, including one for 'Load Management' and another for 'Carrier Management'. The interface is densely packed with information, including search filters and data entry fields.

Load Management Workspace

## WE ARE A DIFFERENT KIND OF TMS

Transportation execution is the glue that holds your supply chain together. Created for brokers, shippers and logistics service providers, our uniquely designed TMS manages all activity from planning and optimization through rate management, integration, execution and payment.

### Fundamentally Different

An architecture and design distinct from anything else on the market.

### Most Flexible

The power to self-configure; unique routing concepts; proprietary algorithms.

### Highest Satisfaction Rate

The happiest customers and highest retention rate in the industry.
